THE PACKING SEASON

Generally commences from the first to the middle of March in the Spring, and about the first of October in the Autumn. The season is not regulated, however, by any definite date, nor by the state of vegetation at the locality of the planter, but by the condition of the trees when received. Parties south of us may receive our trees some weeks after their season has opened, yet when planted they will give entire satisfaction.

PACKING

All orders for forwarding by freight or express, except in car load lots, are carefully packed in bales or boxes, for which a charge is made sufficient to remunerate for the cost of material and time.

SHIPPING

Our shipping facilities to the West by fast freight lines, and to New England and the South by various steamship lines, are unexcelled in rapidity of transit and low rates of freight charges.

Purchasers are requested to name the mode of conveyance by which they desire their shipments, **otherwise we will despatch to the best of our judgment. After delivering to the forwarders, all articles are entirely at the risk of the purchaser, and should any loss or delay occur, the forwarders alone must be held responsible.**

All packages delivered free of cartage at the Freight and Express Offices in West Chester. Parties desiring stock shipped per express C. O. D. **must** accompany their order with cash to one-half the amount, otherwise no attention will be paid to the same.

NOTICE.

All orders placed with us will be accepted only upon the condition that, should stock be injured by drought, frost, or other casualties before the shipping season, they are to be void.

CLAIMS.

All claims for errors and deficiencies must be made within **ten days** after receipt of the stock. We desire to be notified of our mistakes as early as possible, so that we may rectify the same without delay.

TERMS CASH.

HOOPES, BROTHER & THOMAS.

FRUIT DEPARTMENT.

Taking into consideration the many excellent qualities of this symmetrical and graceful tree, its comparatively rapid growth and entire hardiness, we know of nothing to surpass it for lawn or avenue planting. The attractive avenue of Pin Oaks in Fairmount Park, Philadelphia, is one of the elegant features of the place, being faultless in all that pertains to a popular, beautiful tree for the purpose.
